What Drives Our Success

Our ambition is to have the preeminent Global Markets client franchise with industry leading returns

We are one of three market franchises with deep and consistent global scale across both FICC and Equities

- #2 in Institutional Client Franchise
- #3 in reported revenues

Exceptional and experienced talent enables:

- Global and deep client relationships
- Superior risk intermediation
- Scalable, client-centric technology platforms
Global Markets Opportunities Arising from Secular Change

Secular Forces
- Regulatory Changes
- Technological Innovation

Impact
- Lower Market Liquidity
- Higher Capital Consumption
- Active to Passive Shift
- Changing Competitive Dynamics

Opportunities
- Expand Risk Intermediation Advantage
- Increase Client Financing Activities
- Enhance Client Experience

Growing Share and Returns

These notes refer to the financial metrics and/or defined terms presented on:

Slide 1:
1. Source: Coalition institutional client analytics for FY2018. Institutional clients only. Analysis excludes captive and non-core products

Slide 4:
1. RWAs are risk weighted assets
2. US banks: externally reported revenues adjusted for disclosed one-off items (Tradeweb gains of ~$335mm in JPM and $355mm in C) and fully-taxable equivalent adjustments of $2,259mm in JPM. European banks: externally reported revenues adjusted for disclosed one-off items for 9M19 and FY2019 for UBS (Tradeweb gains of $338mm in UBS, €101mm in DB and £126mm in BARC, gain from the net impact of treasury operations and hedging counterparty risk in BARC and a change in the valuation of an investment of €(37)mm in 3Q19 and €36mm in 1Q19 in DB); DB excludes Equities revenues generated in 1H19; Goldman Sachs Global Investment Research trading revenue estimates used for 4Q19, except for UBS; all revenue estimates have been converted to dollars for consistency, using a quarterly average of their respective conversion rates

Slide 7:
1. Return on average common shareholders’ equity (ROE) is calculated by dividing net earnings applicable to common shareholders by average monthly attributed common shareholders’ equity. Attributed tangible common shareholders’ equity is calculated as attributed common shareholders’ equity less attributed goodwill and identifiable intangible assets. Return on average tangible common shareholders’ equity (ROTE) is calculated by dividing net earnings applicable to common shareholders by average monthly attributed tangible common shareholders’ equity. Management believes that ROTE is meaningful because it measures the performance of businesses consistently, whether they were acquired or developed internally. Attributed tangible common shareholders’ equity and ROTE are non-GAAP measures and may not be comparable to similar non-GAAP measures used by other companies. The table below presents a reconciliation of average attributed common shareholders’ equity to average attributed tangible common shareholders’ equity:

<table>
<thead>
<tr>
<th>Unaudited, $ in millions</th>

Cautionary Note on Forward-Looking Statements

Statements about the firm’s target metrics, including its target ROE, ROTE, efficiency ratio and CET1 capital ratios, and how they can be achieved, and statements about future operating expense (including future litigation expense), amount and composition of future Assets under Supervision, planned debt issuances, growth of deposits and associated interest expense savings, future geographic location of its employees, and the timing and profitability of its business initiatives, including its launch of new businesses or new activities, its ability to increase its market share in incumbent businesses and its ability to achieve more durable revenues and higher returns from these initiatives, are forward-looking statements, and it is possible that the firm’s actual results may differ, possibly materially, from the targeted results indicated in these statements.

Forward looking statements, including those about the firm’s target ROE, ROTE, efficiency ratio, and expense savings, and how they can be achieved, are based on the firm’s current expectations regarding its business prospects and are subject to the risk that the firm may be unable to achieve its targets due to, among other things, changes in the firm’s business mix, lower profitability of new business initiatives, increases in technology and other costs to launch and bring new business initiatives to scale, and increases in liquidity requirements. Statements about the firm’s target ROE, ROTE and CET1 capital ratios, and how they can be achieved, are based on the firm’s current expectations regarding the capital requirements applicable to the firm and are subject to the risk that the firm’s actual capital requirements may be higher than currently anticipated because of, among other factors, changes in the regulatory capital requirements applicable to the firm resulting from changes in regulations or the interpretation or application of existing regulations or changes in the nature and composition of the firm’s activities. Statements about the timing and benefits of business and expense savings initiatives, the level and composition of more durable revenues and increases in market share are based on the firm’s current expectations regarding its ability to implement these initiatives and may change, possibly materially, from what is currently expected. Due to the inherent uncertainty in these forward-looking statements, investors should not place undue reliance on the firm’s ability to achieve these results.

For a discussion of some of the risks and important factors that could affect the firm’s future business, results and financial condition, see “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2018. You should also read the cautionary notes on forward-looking statements in our Form 10-Q for the period ended September 30, 2019 and Earnings Results Presentation for the Full Year and Fourth Quarter 2019. For more information regarding non-GAAP financial measures such as ROTE, refer to the footnotes in the Earnings Release and Earnings Presentation for the Full Year and Fourth Quarter 2019 and information on the calculation of non-GAAP financial measures that is posted on the Investor Relations portion of our website: www.goldmansachs.com.

The statements in the presentation are current only as of January 29, 2020 and the firm does not undertake to update forward-looking statements to reflect the impact of subsequent events or circumstances.
