## Financial Overview Highlights

- During the quarter, the firm successfully executed on its Business Continuity Planning strategy amid the global COVID-19 pandemic, providing clients with advice, execution and liquidity. The firm generated \$8.74 billion in quarterly net revenues during the first quarter of 2020, reflecting strength in franchise activity
- 1Q20 net revenues were essentially unchanged YoY, reflecting significantly lower net revenues in Asset Management, largely offset by significantly higher net revenues in Global Markets, Investment Banking and Consumer & Wealth Management
- 1Q20 provision for credit losses were significantly higher YoY, reflecting the challenging economic environment, loan growth and the impact of accounting for credit losses under the CECL standard<sup>5</sup>
- 1Q20 operating expenses increased YoY, primarily due to significantly higher expenses related to brokerage, clearing, exchange and distribution fees, higher net provisions for litigation and regulatory proceedings, and higher expenses related to consolidated investments

## Investment Banking Highlights

- 1Q20 net revenues were significantly higher YoY
  - Financial advisory net revenues were lower, reflecting a decrease in industry-wide completed mergers and acquisitions transactions
  - Underwriting net revenues were significantly higher, reflecting higher net revenues from IPOs and convertible offerings, as well as asset-backed and leveraged finance activity
  - Corporate lending net revenues were significantly higher, due to significantly higher net revenues related to relationship lending activities, reflecting the impact of changes in credit spreads on hedges
- Remained ranked #1 in worldwide announced and completed M&A for the year-to-date<sup>2</sup>
- Overall backlog<sup>3</sup> decreased QoQ, reflecting decreases in advisory and debt underwriting backlog, partially offset by an increase in equity underwriting backlog; backlog increased YoY

## FICC Highlights

- 1Q20 net revenues were significantly higher YoY
  - FICC intermediation net revenues were significantly higher, reflecting significantly higher net revenues in currencies and credit products, higher net revenues in commodities and slightly higher net revenues in interest rate products, partially offset by significantly lower net revenues in mortgages
  - FICC financing net revenues were higher, driven by repurchase agreements
- 1Q20 operating environment was characterized by strong client activity, particularly in interest rate products, currencies and credit products, and higher levels of volatility, while interest rates decreased and credit spreads widened during the quarter

## Equities Highlights

- 1Q20 net revenues were significantly higher YoY
  - Equities intermediation net revenues were significantly higher, driven by strength in derivatives; worked with clients to navigate the more volatile and dislocated market backdrop
  - Equities financing net revenues were slightly higher, reflecting higher average customer balances
- 1Q20 operating environment was characterized by strong client activity, higher levels of volatility and lower global equity prices, compared with 4Q19

## Asset Management Highlights

- 1Q20 net revenues were significantly lower YoY, as macroeconomic concerns resulting from the challenging operating environment led to decreased global equity prices, wider credit spreads and uncertainty in the economic outlook
  - Management and other fees from our institutional and third-party distribution asset management clients were higher, reflecting higher average AUS, partially offset by a lower average effective fee due to shifts in the mix of client assets and strategies
  - Incentive fees were significantly higher, driven by harvesting
  - Equity investments results reflected net gains from pending and completed sales of ~\$775 million and operating net revenues from consolidated investment entities of ~\$200 million, offset by mark-downs on our private equity portfolio of ~\$500 million and mark-to-market net losses on our public equity portfolio of ~\$500 million
  - Lending and debt investments results reflected significant net losses across debt securities

## Consumer & Wealth Management Highlights

- 1Q20 net revenues were significantly higher YoY
  - Wealth management net revenues were higher, due to significantly higher Management and other fees, primarily reflecting higher average AUS and higher transaction volumes, and higher Incentive fees
  - Consumer banking net revenues were higher, driven by higher net interest income, primarily reflecting an increase in deposit balances and credit card loans
- Continued to scale the digital consumer deposit platforms, as consumer deposits increased by a record \$12 billion in 1Q20 to \$72 billion<sup>4</sup>
- The firm announced support to Marcus and Apple Card consumers by offering flexibility to defer payments without incurring any charges

## Assets Under Supervision Highlights<sup>3,4</sup>

- Firmwide AUS decreased \$41 billion during the quarter to \$1.82 trillion, including Consumer & Wealth Management decreasing \$52 billion and Asset Management AUS increasing \$11 billion
  - Net market depreciation of \$114 billion, primarily in equity assets
  - Liquidity products net inflows of \$72 billion
  - Long-term net inflows of \$1 billion
- Over past five years, total cumulative organic long-term AUS net inflows of ~\$190 billion

## 1Q20 AUS Mix<sup>3,4</sup>

# Net Interest Income and Loans

## Net Interest Income by Segment (\$ in millions)

## Net Interest Income Highlights

- 1Q20 net interest income increased \$95 million YoY
- The YoY increase in net interest income reflects the continued shift to lower cost deposit funding from wholesale funding

## Loan Highlights

- Total loans increased \$19 billion, up 17% QoQ, reflecting draws on committed corporate lines
- Provision for credit losses was \$937 million for 1Q20, significantly higher YoY, primarily due to significantly higher provisions related to corporate loans as a result of continued pressure in the energy sector and the impact of COVID-19 on the broader economic environment. In addition, 1Q20 included provisions related to growth in corporate loans and credit card loans, and the impact of accounting for credit losses under the CECL standard<sup>5</sup>
- Allowance for credit losses was \$3.20 billion as of March 31, 2020
- 1Q20 annualized firmwide net charge-off rate was 0.5%

<i>Effective Tax Rate</i>	<b>10.0%</b>		

## Expense Highlights

- 1Q20 total operating expenses increased YoY, reflecting:
  - Higher non-compensation expenses, which included:
    - Significantly higher expenses related to brokerage, clearing, exchange and distribution fees, reflecting an increase in activity levels
    - Higher net provisions for litigation and regulatory proceedings
    - Higher expenses related to consolidated investments, including impairments
    - Remainder of the increase primarily attributable to higher expenses related to technology, professional fees and the firm's credit card activities, and expenses related to the consolidation of United Capital, partially offset by lower market development expenses
  - Compensation and benefits expenses were essentially unchanged
- 1Q20 effective income tax rate of 10.0%, down from the full year rate of 20.0% for 2019, primarily due to tax benefits on the settlement of employee share-based awards and the impact of lower pre-tax earnings on permanent tax benefits in 1Q20

## Capital and Balance Sheet Highlights

- Both Standardized and Advanced CET1 ratios decreased QoQ
  - Increase in both Standardized and Advanced RWAs reflected higher market and credit RWAs driven by market volatility and increased exposure
  - Decrease in CET1 capital reflected common stock repurchases and dividends in excess of net earnings
- Returned \$2.38 billion of capital to common shareholders during the quarter
  - Paid \$449 million in common stock dividends
  - Repurchased 8.2 million shares of common stock, for a total cost of \$1.93 billion<sup>3</sup>
- The firm's balance sheet increased \$97 billion QoQ, reflecting client demand
  - Maintained highly liquid balance sheet as GCLA<sup>3</sup> averaged \$243 billion<sup>4</sup> for 1Q20
  - Deposits increased \$30 billion QoQ, reflecting an increase in consumer, institutional and transaction banking deposits
- BVPS increased 4.4% QoQ, primarily due to debt valuation adjustment

# Cautionary Note Regarding Forward-Looking Statements

This presentation contains “forward-looking statements” within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts, but instead represent only the firm’s beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside of the firm’s control. It is possible that the firm’s actual results, financial condition and liquidity may differ, possibly materially, from the anticipated results, financial condition and liquidity indicated in these statements. For information about some of the risks and important factors that could affect the firm’s future results, financial condition and liquidity and the forward-looking statements below, see Item 8.01 of the firm’s Report on Form 8-K dated April 15, 2020 and “Risk Factors” in Part I, Item 1A of the firm’s Annual Report on Form 10-K for the year ended December 31, 2019.

Information regarding the firm’s assets under supervision, capital ratios, risk-weighted assets, supplementary leverage ratio, balance sheet data and global core liquid assets (GCLA) consists of preliminary estimates. These estimates are forward-looking statements and are subject to change, possibly materially, as the firm completes its financial statements.

Statements regarding (i) estimated GDP growth, (ii) the impact of the COVID-19 pandemic on our business, results, financial position and liquidity, (iii) the timing and profitability of business initiatives and the achievability of medium- and long-term targets and goals, (iv) the future state of the firm’s liquidity and regulatory capital ratios, (v) the firm’s prospective capital distributions, (vi) the firm’s future effective income tax rate, and (vii) the firm’s investment banking transaction backlog are forward-looking statements. Statements regarding estimated GDP growth are subject to the risk that actual GDP growth may differ, possibly materially, due to, among other things, changes in general economic conditions. Statements about the effects of the COVID-19 pandemic on the firm’s business, results, financial position and liquidity are subject to the risk that the actual impact may differ, possibly materially, from what is currently expected. Statements about the timing and benefits of business initiatives and the achievability of medium and long-term targets and goals are based on the firm’s current expectations regarding our ability to implement these initiatives and achieve these targets and goals and may change, possibly materially, from what is currently expected. Statements about the future state of the firm’s liquidity and regulatory capital ratios, as well as its prospective capital distributions, are subject to the risk that the firm’s actual liquidity, regulatory capital ratios and capital distributions may differ, possibly materially, from what is currently expected. Statements about the firm’s future effective income tax rate are subject to the risk that the firm’s future effective income tax rate may differ from the anticipated rate indicated, possibly materially, due to, among other things, changes in the firm’s earnings mix or profitability, the entities in which the firm generates profits and the assumptions made in forecasting the firm’s expected tax rate, and potential future guidance from the U.S. IRS. Statements about the firm’s investment banking transaction backlog are subject to the risk that transactions may be modified or not completed at all and associated net revenues may not be realized or may be materially less than those currently expected. Important factors that could have such a result include, for underwriting transactions, a decline or weakness in general economic conditions, an outbreak of hostilities, volatility in the securities markets or an adverse development with respect to the issuer of the securities and, for financial advisory transactions, a decline in the securities markets, an inability to obtain adequate financing, an adverse development with respect to a party to the transaction or a failure to obtain a required regulatory approval.

1. Annualized return on average common shareholders' equity (ROE) is calculated by dividing annualized net earnings applicable to common shareholders by average monthly common shareholders' equity. Tangible common shareholders' equity is calculated as total shareholders' equity less preferred stock, goodwill and identifiable intangible assets. Annualized return on average tangible common shareholders' equity (ROTE) is calculated by dividing annualized net earnings applicable to common shareholders by average monthly tangible common shareholders' equity. Tangible book value per common share (TBVPS) is calculated by dividing tangible common shareholders' equity by basic shares. Management believes that tangible common shareholders' equity and TBVPS are meaningful because they are measures that the firm and investors use to assess capital adequacy and that ROTE is meaningful because it measures the performance of businesses consistently, whether they were acquired or developed internally. Tangible common shareholders' equity, ROTE and TBVPS are non-GAAP measures and may not be comparable to similar non-GAAP measures used by other companies.

The table below presents average and ending equity, and a reconciliation of average and ending common shareholders' equity to average and ending tangible common shareholders' equity:
